

QuickSense | Pressure

High-performance pressure monitoring made simple.

The fastest and easiest way to get high quality pressure data from remote operations. **See inside your operations like never before.**

Quickly and clearly visualize the fluid mechanics of production operations.

Capture and analyze critical events.

Gain key insights to better solve operational challenges.

Easy 5-minute install

A quick and easy 5-minute DIY install for most applications of the QuickSense Pressure. Plug and play this fully-integrated and pre-configured package that houses sensors, power, communications and edge computing.

Low maintenance

Ongoing remote firmware updates for devices. Internal sensors monitor device health and performance, so that users can be proactively notified of developing issues.

Precise 1-s data without gaps

Standard 1-second sampling, capturing pressure changes down to 0.01 psi (0.07 kPa). Time-synchronized and temperature-compensated measurements for greater precision. Data delivered even if connectivity is lost for up to 2 weeks.

Solutions from QuickSense Pressure

NEW Frack Monitoring

More precise data
for better diagnostics.

Leak Detection

Reduce costs and risks
with instant alarms.

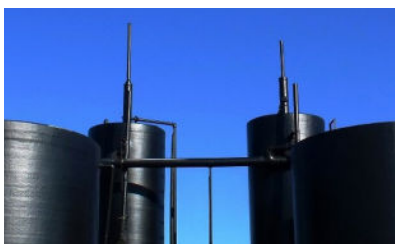

Rod Pump Performance

Reduce power consumption
by up to 60%.

Slug Monitoring

Increase gas production
by up to 20%.

Tank Level Monitoring

Remote tank visibility
with ease.

Pig Tracking

See how pigs are moving
through your lines.
